

CITY OF EAST PALO ALTO

Public Works Department - Engineering Division

1960 Tate Street, East Palo Alto, CA 94303

Tel. No. 650.853.3189, Fax. No. 650.853.3179

Addendum Two

General Questions and Answers:

1. Does the City currently have a working model of the entire distribution system, or just parts of it? If so, when was the last time it was updated? What is the software it runs on? **As part of the 2010 Water System Master Plan (WSMP), WaterCAD® modeling software was used (Version 7.0 was used for the 2010 WSMP) and H2ONet® was used to run the calibration. Additional information may be found in section 6 of the 2010 WSMP here: <https://www.cityofepa.org/econdev/page/water-system-master-plan>**
2. Can the City provide a draft copy of the 2020 UWMP now so that we can review and incorporate into our scope of work? **The Public Draft of the 2020 UWMP will be published by Friday 5/28. It will be posted here: <https://www.cityofepa.org/publicworks/project/urban-water-management-plan-update-2020>**
3. Has the City considered preparing an environmental document (e.g. EIR or MND) to streamline future project approvals? Was this done for the prior water master plan? **This is not something that the City is considering at this stage. This was not done for the previous water system master plan.**
