

City of East Palo Alto

Public Works Department

Addendum

General questions and answers:

1. Does prevailing wage apply to routine, janitorial street sweeping for the City of East Palo Alto?

Yes, street sweeping is subject to prevailing wage.

2. We noticed that the monthly curb-miles in this RFP are significantly less than the existing contract, driven primarily by lower weekly arterial miles. Has the City decided to reduce its scope of services from the current street sweeping program?

The scope of services will not change from the current scope. We used center line miles as our measuring unit, which might make the monthly mile totals look significantly smaller.
